Hair Loss: The Ultimate Resource Of Tried And Tested Solutions For Hair Loss And The Maintenance Of Healthy Hair

Synopsis

Hair Loss: The Ultimate Resource of Tried and Tested Solutions for Hair Loss and the Maintenance of Healthy Hair

Read on your PC, Mac, smart phone, tablet or Kindle device. Hair loss affects millions of people around the world. Whether gradual or sudden, loss of hair can be damaging to morale, self-esteem, confidence and it may also be an indication of your current state of health. As someone who has been experiencing hair loss since his early twenties, I have tried and tested many products on the market, chemical and natural, that reduce hair loss and encourage re-growth. The solution however doesn't just end there. There are many other factors in life that can contribute to loss, growth and the maintenance of healthy hair. This resource will help you understand the cause and also provide numerous hair treatments that I and millions have tried with effective results. This has been a long personal journey of trial and education. When something such as hair loss is affecting you, time matters and we all wish for an immediate solution. Save your time, save your hair and read this. Hair loss is no longer a concern for me, neither is the chore of daily treatment when you have the knowledge of what works.

Contents

Customer Reviews

Luka Je presents his reasons for writing this book in a clever introduction: 'I'm fast approaching 30 as I write this. I too now also have a large forehead. The hairline has been receding since my early twenties. The thick, dense volume of hair I once had on top is slowly thinning. I have no bald patches but when my hair grows beyond three weeks of a haircut the sides puff out and have more lift than the top, to me it doesn't look a fine balance and it becomes a nightmare to style to a presentable fashion. I'm very limited to what I can do with my hair and once seated in my local barber's seat I almost always reply "yes" to that same old question... "same as usual?" I've had more hairstyles growing up than anyone I've ever known. I've tried almost every hair styling product out there that isn't a toxic concoction.' So we can all identify with Luka! In this very well written book Luka discusses the various forms of hair loss - Alopecia areata is characteristic of patchy hair loss all over the body, and is due to an attack on the hair follicles by the immune system; only medical intervention can resolve this type of hair loss and it can be reversible. Androgenic alopecia is the more common type of hair loss that this book is more targeted at. This is believed to be inherited and difficult to treat. Other forms of hair loss are minor in significance and are either natural or easily treatable with or without medical intervention. The causes - aging, hormone changes, genetics, skin trauma and certain illnesses.
