Sebastian Pole is a British practitioner of ayurveda, traditional Chinese and Western herbal medicine as well as a professional teacher of yoga and is a pioneer in the cultivation of organic ayurvedic herbs in the UK, and has had extensive clinical training in ayurvedic clinics and hospitals in India. He has presented the health care community and the ayurvedic profession with what surely will become the definitive textbook of ayurvedic herbal medicine for aspiring practitioners and manual for clinicians in the Western and English-speaking world. This book has filled a desperate and long-felt need for an English-language work that is at a sufficient level of clinical detail for working and student practitioners of ayurveda. It is replete with color photographs, superbly

well-organized details on each herb catalogued, and very well written. I refer to it daily in both my practice and my teaching."Ayurvedic Medicine: The Principles of Traditional Practice" provides a deep and broad understanding of the theory underlying ayurvedic pharmacology and therapeutics along with a practical materia medica of over 80 ayurvedic plant remedies, each carefully denoted by its common Indian name, Sanskrit and Latin name, description, color photographs of the herb in both its prepared and fresh forms, energetics, phytoconstituents, ayurvedic and biomedical actions, indications, contraindications, safety issues, formulations and dosage, along with additional notes. The work is divided into three main sections.
