## Customer Reviews

Several months ago, a close friend of mine confided in me that she was having a lot of problems conceiving a baby. I wanted to find a solution for her, so I headed online to research on my own. After reading the wonderful reviews, I purchased this book, really hoping that it would help teach her how to get pregnant fast. We read it together and I was immensely impressed at how practical and straightforward the advice and instructions were. Nearly everything suggested was natural and easy to apply. I especially liked the herbal remedy section, as I am a self-proclaimed health junkie! I am so happy to say that my friend, who had tried to conceive for nearly a year without success, is now 8 weeks pregnant! This book was definitely worth buying, and my friend and I have recommended it already to another girl we know who wants to start a family!

There are great steps in this book Get pregnant in 3 months-The How to Get Pregnant Fast Proven Program. The author lets you know that you must follow all 13 steps for help getting pregnant and always see your gynecologist or doctor before beginning any program. What I took away from this book is to get your sleep and also cutting down on the stress, learn how to meditate. There are certain herbs and vitamins and if you are taking medications they also can work against you. I liked that the author pointed out make sure you want to get pregnant because having a baby is not a whim or a want. Please take it seriously! Great book for responsible, want to be parents, a must read!

I purchased this book for myself because I have been trying to get pregnant without success. Right from the very beginning I closely identified with Diana's plight of being unable to conceive. Her support and encouragement really helped give me confidence on how to get pregnant fast. The book is based around 13 sets of instructions and steps to show you how to get pregnant fast. At first I was skeptical, after having tried what I thought was everything. But Diana's book is knowledgeable and contains many techniques and tricks that I hadn't even thought of. For example, I never even considered meditation or yoga exercises as a way to help me get pregnant. Diana gives examples of specific poses that really stimulate your body's fertility, which is very helpful when other approaches aren't helping. Overall, this book is really helpful and explains the entire process of getting pregnant from start to finish. I found it very comprehensive and I think it is a wonderful guide for anyone trying

to get pregnant. I'd highly recommend it to anyone out there looking to conceive a child!

Are you one of those women (or men) that have been trying to add to your family without much success, does it seem like you will go crazy from the stress of it all? If so, then you are just like me and millions of others looking for advice on how to get pregnant. After speaking with my doctor and not getting the type of advice I was looking for I decided to grab a few titles to see if anyone had tips that would help. After reading though a few books that seemed only to encourage medical intervention such as IVF, I found this title which offers a lot of informative advice that's practical and easy to implement that will help increase your chances of getting pregnant. I was tired of temperature charts, period tracking and timed procreation attempts that really started to wear on the excitement of having a baby. Like most, being tired of the wait and see described me perfectly; the author of this book was able to dispel many of the common infertility myths while offering proven advice to increase your natural fertility. The book was easy to read without some of the complicated lingo that tends to plague most health related help books. She also gives hope in a comforting way which is just what most women facing this type of difficulty needs. If you are ready to get rid of the hype and use real information that will help you realize your family dreams then this title is a good choice for you.

If you are having trying conceiving then I highly recommend reading this book. I think it's also a bonus that it tells you how to get pregnant fast. Before reading this book, I was so stressed! My husband and I tried and tried for months and nothing. I honestly thought I was infertile. My husband is younger than I am so there was no way it was him. It had to be me! I just knew it had to be me. I consulted a doctor and told her our ages: I'm 33 and he's 25. She recommended I get tested for infertility but not my husband. That made me feel even worse. I decided I needed to educate myself on the proper way of getting pregnant. Diana Diaz's book is not very long. It's about 40 pages and really cuts to the chase. I think what I liked most about it is the fact that she explains everything so easily. For example, this book mentions contraception and its effects on conceiving. I had been on birth control for many years and although my husband named it as the culprit, I didn't think so. With this book, my stress was lessened just a bit. It could've been the birth control! Then, it stated high BMI levels. I was overweight! My BMI was almost 30. I was actually classified as obese! I had to lose weight. Then, it mentioned Dong Quai, which a friend of mine had mentioned to me prior and I had made a mental note to buy this, but never did. The book mentioned it and I said, "This time, I am buying this!" So I did. It helps reduce cramps and regulates your

period. What a relief! So I had my To-Do list. I visited my parents for 6 weeks alone, without my husband and decided to work on myself. I kept a positive mentality the whole time even though I missed him terribly. I went back home to my hubby, 20 pounds lighter (Slow carb diet!) and this is the honest-to-goodness truth, I got pregnant the weekend I came back. I'm 17 weeks now! My husband and I are over the moon about this little person in my belly. I wish everyone else trying to conceive the same success!
