# Superfood Or Superthreat: The Issue Of Genetically Engineered Food (Issues In Focus Today)

## Synopsis

Genetically engineered food is made by inserting genes from other organisms to give an animal or crop desirable traits. Some say GE food is dangerous to people and to the environment. Others say it can solve the world's hunger problems. Author Kathlyn Gay explores the viewpoints on both sides of the argument so that readers can make up their own minds on this controversial topic.

## Book Information

Series: Issues in Focus Today

Library Binding: 112 pages

Publisher: Enslow Publishers (June 1, 2007)

Language: English

ISBN-10: 0766026817

ISBN-13: 978-0766026810

Product Dimensions: 9.3 x 6.8 x 0.4 inches

Shipping Weight: 12.8 ounces

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #3,735,086 in Books (See Top 100 in Books) #33 in [Books > Teens > Education & Reference > Science & Technology > Technology > Agriculture](#) #90 in [Books > Health, Fitness & Dieting > Nutrition > Genetically Engineered Food](#) #1964 in [Books > Teens > Personal Health](#)

## Customer Reviews

This is an excellent and objective depiction of an issue oftentimes fraught with emotion. It accurately presents both the activist perspectives on the negative claims made on the use of genetic engineering and then presents the opposing viewpoint and scientific studies to refute those claims. As an educator, I strongly recommend this book for use in school classrooms and libraries for this very fact. We should be teaching our children to examine the issues and facts to make their own decisions. That is exactly what this book facilitates.
