# Driven By Data: A Practical Guide To Improve Instruction

## Synopsis

Driven by Data offers valuable tips and general guidelines about data-based methods and the difficulties surrounding the implementation of data-driven instruction. Through a CD-ROM, this guidebook provides all the tools needed to launch data-driven instruction effectively, such as an implementation rubric, meeting agendas, calendars, assessment templates, and more. Written by Paul Bambrick-Santoyo, who has worked with over 1,000 schools across the nation, the book clearly shows how to maneuver through assessments and statistics. Bambrick-Santoyo offers vital tips, such as: how to create a data culture, how to run a successful data analysis meeting, how to write quality assessments, and how to deal with resistance from your teachers. The book also includes twenty case studies of high-performing schools. School leaders will find this resource useful for achieving remarkable results and immense gains, regardless of the school's background, leader, or demographic. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (44 customer reviews)

Best Sellers Rank: #27,631 in Books (See Top 100 in Books) #25 in [Books > Textbooks > Education > Administration](#) #43 in [Books > Education & Teaching > Schools & Teaching > Education Theory > Administration](#) #47 in [Books > Education & Teaching > Schools & Teaching > Education Theory > Reform & Policy](#)

## Customer Reviews

After teaching for fifteen years, I had the opportunity to teach at North Star Academy in Newark, NJ. It is a challenging place to work, but it is worth it because you know you are making a difference. In a district where less than 5% of students make it through college, North Star sends 100% of its graduates to college and is on course to have over 75% of its alumni complete a degree. And it does all of this without being selective about the students who attend. One of the main reasons

North Star is successful because it is "driven by data". Decisions on what happens in the classroom are not made arbitrarily, but are determined by careful examination of interim assessments of students. With this information, teachers are able to craft a classroom experience that helps all students maximize their performance to the point where North Star has closed the achievement gap and because one of the most successful urban schools in the nation. Data-driven decision-making has descended to the level of jargon in education these days but, done right, it is one of the most powerful tools in a school's arsenal. Unfortunately, too many schools don't do it right and have tarnished a great idea. At North Star, Paul Bambrick-Santoyo has made it work. Now, he shares what works with school leaders and teachers across the nation in meetings and workshops. This book outlines the process. The first half of the book covers what data-driven decision-making is and how it is meant to work in a school. He shares what should be the roles of teachers, school leaders, and district leaders for effective implementation. He shares anecdotes and data from various schools that have implemented the system effectively (including North Star).
