Customer Reviews

customer support is great. had a little trouble with first shipment that mailman looks to have mishandled it; but customer support here was very good and provided a re-send in new condition. will buy again once complete.

My son is going to school to become an Aviation Maintenance Technician and when he brought this book to school with him everybody wanted to know where to get one too. It is clear, concise and just what an AMT needs to do his job and keep the best record of it.

This logbook is great! It has space for detailed maintenance descriptions for both A&P mechanics, as well as for A&P students like me who are working on meeting the training requirements for the FAA licenses. The size and spiral binding is terrific. It would be even better if ASA would make a logbook like this one that was specifically for students.

I am working on my A&P and this log is perfect for helping me track my hours in the different

categories. I would recommend this logbook to all who are going through their A&P training.

Looked everywhere for these. Thank god had it. I can now log experience and maintenance on my logbook. Can't wait till I get my A/P license!

Perfect for recording aviation maintenance activities.
