# Fabrication Engineering At The Micro- And Nanoscale (The Oxford Series In Electrical And Computer Engineering)

FOURTH EDITION

FABRICATION ENGINEERING
AT THE MICRO- AND NANOSCALE

Stephen A. Campbell

OXFORD
UNIVERSITY PRESS

Synopsis

Designed for advanced undergraduate or first-year graduate courses in semiconductor or microelectronic fabrication, Fabrication Engineering at the Micro- and Nanoscale, Fourth Edition, covers the entire basic unit processes used to fabricate integrated circuits and other devices. With many worked examples and detailed illustrations, this engaging introduction provides the tools needed to understand the frontiers of fabrication processes.

Book Information

Series: The Oxford Series in Electrical and Computer Engineering

Paperback: 688 pages

Publisher: Oxford University Press; 4 edition (November 15, 2012)

Language: English

ISBN-10: 0199861226

ISBN-13: 978-0199861224

Product Dimensions: 9.2 x 1.2 x 7.5 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars See all reviews (7 customer reviews)

Best Sellers Rank: #270,760 in Books (See Top 100 in Books)   #52 in Books > Engineering & Transportation > Engineering > Electrical & Electronics > Electronics > Semiconductors   #89 in Books > Engineering & Transportation > Engineering > Electrical & Electronics > Electronics > Microelectronics   #1367 in Books > Textbooks > Engineering

Customer Reviews

I am right now using it as textbook, and this book is just unreadable! I am a graduate student now study electrophysics with a Bachelor background of automation. Honestly, I do lack background of things like solid-state chemistry and electronic materia as background for subject this book is about. However, it is not only the problem that this textbook has, which is NEVER EXPLAINS ANY ESSENTIAL TERMS FOR ANY TOPIC, which makes reading it require a huge amount of additional reading to understand a single term which the author could explain with a single word! Guess what? You will become a freaking chemist after you trying to understand each new term of this book, but you just don't have that much time in a single semester! The second problem is about equations the author introduced. Yes! The author gave a huge number of equations, WITH A LOT OF UNEXPLAINED ARGUMENT! This is a problem no one can understand even if he has a boundfull background! How should I know what the hell does an unexplained x stand for in a new equation?

This leads to the third problem, the author give a lot of ambiguous description either for readings or problems! Sentence like 'diffusion length is much larger than the widhth of the initial profile' can be find everywhere in reading parts and problems, making you guess like a moron: 'may be the width here means depth? Or is it?' No, you can absolutely find nothing explained what is length here in context!

Fabrication Engineering at the Micro- and Nanoscale (The Oxford Series in Electrical and Computer Engineering) The Science and Engineering of Microelectronic Fabrication (The Oxford Series in Electrical and Computer Engineering) Ultrafast Laser Processing: From Micro- to Nanoscale Computer Architecture: From Microprocessors to Supercomputers (The Oxford Series in Electrical and Computer Engineering) Learn to Weld: Beginning MIG Welding and Metal Fabrication Basics - Includes techniques you can use for home and automotive repair, metal fabrication projects, sculpture, and more Sustainable Micro Irrigation: Principles and Practices (Research Advances in Sustainable Micro Irrigation) Linear System Theory and Design (The Oxford Series in Electrical and Computer Engineering) Modern Digital and Analog Communication Systems (The Oxford Series in Electrical and Computer Engineering) An Introduction to Mixed-Signal IC Test and Measurement (Oxford Series in Electrical and Computer Engineering (Hardco) Electric Machinery and Transformers (The Oxford Series in Electrical and Computer Engineering) Operation and Modeling of the MOS Transistor (The Oxford Series in Electrical and Computer Engineering) Operation and Modeling of the MOS Transistor: Special MOOC Edition (The Oxford Series in Electrical and Computer Engineering) Photonics: Optical Electronics in Modern Communications (The Oxford Series in Electrical and Computer Engineering) Digital Control Systems (The Oxford Series in Electrical and Computer Engineering) Design of Analog Filters 2nd Edition (The Oxford Series in Electrical and Computer Engineering) CMOS Analog Circuit Design (The Oxford Series in Electrical and Computer Engineering) Microelectronic Circuits (The Oxford Series in Electrical and Computer Engineering) 7th edition Understanding Semiconductor Devices (The Oxford Series in Electrical and Computer Engineering) Microelectronic Circuits Revised Edition (Oxford Series in Electrical and Computer Engineering) Laboratory Explorations to Accompany Microelectronic Circuits (The Oxford Series in Electrical and Computer Engineering)
