My sister was diagnosed as having COPD a few years ago. Since then she has read all available material on the subject. After finding this book on the new book shelf at the library, she asked me to order it for her. She believes it is the most comprehensive, up-to-date material written on the subject, with many suggestions about diet, exercise, etc. She is putting into practice everything

she's read, and so far, so good. At her last checkup, her lungs were clear. This has given her new hope that she has some control over her condition.

There is nothing in this book about a 10 or 12 week program, nothing broken into steps or weeks, and the term "solution" is misleading. It is a good primer for a person newly diagnosed with COPD who needs a clear overview, someone unwilling or unable to search the Internet, or someone unable to attend a good rehab program. The self-references were a little annoying, such as saying, "What I call a downward spiral," a phrase that's been widely used for decades. It is clear and well-organized.

I was given a copy of this book to review by the publisher. I write blogs about copd and suffer from stage 4, very severe copd. This book to me is essential reading for anyone with copd. Offering a comprehensive 10 week programme to improve your life. This is one you will not regret buying. Dawn has a 100% success rate with her patients, and she will become your personal therapist once you start reading. Just about every aspect of living with copd is covered in this brilliant copd book that is well written in plain language so it is easy to understand, and is great from the first chapter. On a personal level it showed me how to use my medication right, which has made my breathing easier. Taught me the 'huff technique' to get that phlegm off my chest easier. And how to use the 'pursed lip' breathing correctly. Parts on exercise are very easy to follow too as pictures are included to show how to do things right. This really is a first class book. I challenge anyone not to benefit from this book. This is one of those books that I suspect you can read time and again and learn something new each time that you missed, or can be used as a reference book.

I got this book for a friend with COPD. She found it incredibly helpful and informative. When you have a frightening illness, information is power, perhaps one of the few powers you have left to exercise. Thank goodness for helpful books like this one.

Very helpful information for lots of pulmonary diseases!
